vSpace® MANAGEMENT CENTER

NComputing®

vSpace® Management Center for the vSpace Virtualization Platform

Key Features & Benefits

- **Comprehensive**: a flexible, web-based management tool for the NComputing vSpace environment.
- **Centralized**: access an entire NComputing deployment from a single console.
- **Scalable**: manage tens, hundreds or thousands of devices across multiple networks and locations
- **Simple**: easy to install and use with a flexible web-based user interface

Manage NComputing Deployments

- For L-series or M-series devices connecting to vSpace Server 7.0 (and up)

Licensing Requirements

- vSpace Management Center is licensed as a one-time fee per concurrent device to be managed.

Support and Subscriptions

- Basic Support and software updates included for one year.
- Standard and Premium Support, and Subscriptions for ongoing access to upgrades available as a yearly subscription per concurrent connection managed by vSpace Management Center.

Centralized, scalable management for NComputing access devices.

For organizations deploying NComputing desktop access devices, vSpace Management Center provides a highly scalable, flexible and easy to use single point of device management. With its web-based console, IT administrators can manage client devices and vSpace Server instances from anywhere, anytime. vSpace Management Center helps organize a deployment whether it is a single site or multiple sites – and makes it easy to perform management tasks remotely including firmware updates, batch configuration changes, device resets and vSpace Server configuration. By allowing administrators to access and manage all client devices and vSpace Servers from a single interface, regardless of the location, size or number of vSpace virtualization environments, vSpace Management Center dramatically reduces the administrative overhead needed to maintain and control their environment.

FEATURES

SUPPORTED DEVICES	L-series or M-series thin clients for vSpace: L300 or M300 connected to vSpace Server 7.0
SINGLE OR GROUP DEVICE MANAGEMENT	Push settings to manage an individual device (1:1) or use profiles for group management (1:many)
PROFILE-BASED CONFIGURATION	Assign devices to common profiles for rapid, scalable device provisioning and roll-out
EASY FIRMWARE UPDATES	Use the firmware update wizard to simplify device updates and scheduling
SIMPLE STATUS	Central dashboard with device online status and logging view enables rapid assessment of your environment status
CONSOLIDATED INSTALL	Install the complete vSpace Management Center via one installer in under 10 minutes
COMPREHENSIVE LOGGING	System events are continually logged to aid in troubleshooting and to confirm actions
DELEGATED ADMINISTRATION	Supports two levels of management for "view-only" and "edit-capable" access and can be easily configured via Active Directory/LDAP
MANAGEMENT ZONE REDUNDANCY	Deploy multiple servers to manage the same group of devices: mirror the device data for maximum management protection
REMOTE VIEWING & CONTROL	Gain access to user sessions or to individual vSpace Servers. Access the NC Console management utility to provide support or to configure the local vSpace Server settings.
